PROFESSIONAL SUMMARY

Full-stack web developer skilled in the MERN stack, Next.js, and TypeScript, with hands-on experience building deployment-ready applications, asynchronous processing pipelines, and Web3 solutions. Selected as a finalist in the RIFT '26 Hackathon, hosted by the Physics Wallah Institute of Innovation. Seeking a full-stack developer role at a fast-growing tech company.

PROJECTS

BlogHub | Multi-Role Blogging & Content Management Platform GitHub | Live

- Built a full-stack blogging platform supporting user authentication, profile management, post creation and editing, rich-text publishing, post search, likes, comments, and subscriptions.
- Developed a responsive React frontend using Redux Toolkit, React Router, Tailwind CSS, React Hook Form, and TinyMCE, with protected routes and automatic token refresh.
- Implemented RESTful backend APIs with Express.js and MongoDB, including JWT-based authentication, role-based access control, Cloudinary media uploads, author workflows, and admin moderation features.

eLibrary | AI-Assisted Full-Stack Digital Library Platform GitHub | Live

- Built a full-stack digital library platform with AI coding agents, including book discovery, search, authentication, protected routes, bookmarks, ratings, reviews, and personalized recommendations.
- Leveraged AI-assisted development to design and implement reading-progress tracking, reading streaks, and AI-powered study tools for generating flashcards and supporting book-based learning.
- Developed scalable Express.js and MongoDB APIs with admin book-management tools, Cloudinary media uploads, Redis caching, and deployment-ready frontend and backend architecture.

AlgoSplit | 24-Hour Hackathon Project (RIFT '26 Finalist) GitHub | Live

- Contributed as a Backend & Database Developer to a decentralized payment-splitting platform that enables users to split bills, create escrow-based claim links, and send or receive ALGO/USDCa payments.
- Implemented backend and database functionality using Supabase, including payment metadata, transaction history, data persistence, and Row Level Security; contributed 7 GitHub commits to the project.
- Collaborated with the team during a 24-hour hackathon, using agentic AI tools such as GitHub Copilot to accelerate development; selected as a finalist at RIFT '26, hosted by the Physics Wallah Institute of Innovation.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python (Basic), HTML5/CSS3
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Vite
Backend: Node.js, Express.js, RESTful APIs, WebSockets, JWT/RBAC Auth
Databases & Storage: MongoDB, SQL, Cloudinary
Tools & DevOps: Docker, Git, GitHub, Postman, CI/CD, Vercel, Render

EDUCATION

Bachelor of Computer Applications (BCA) from Maharishi University of Information Technology, 2023 – 2026.

HONORS & CERTIFICATIONS

- Selected as a Hackathon Finalist at RIFT '26, hosted by the Physics Wallah Institute of Innovation
- Full-Stack Web Development Certification from Udemy
